scope7 Proxmox Appliances

Appliances pre-installed with PROXMOX

IT administrators and engineers prefer to purchase "solution-in-a-box" as they only need to work with a single vendor for any issue (both hardware and software) with the solution. This means, solutions which come in an appliance are always preferred. In today's complex IT security world, a company typically needs to purchase various different security solutions to complete their security/defense needs. This will mean having to manage and maintain a rack of appliances from different security vendors. The investment and management/maintenance cost is high. If the currently used software solution no longer meets the requirements and is to be changed, there is often no further use for the purchased hardware on which the software was operated. The problem is that the software is tied to the hardware of the provider and therefore not suitable for a change. Typically, replacement of the whole appliance is required. This is expensive.

With SECUDOS's Proxmox Appliances, companies are now able to save on their IT security investments. At the same time, the company enjoys a host of flexibility with allocation of resources and switching of vendors. The SECUDOS Proxmox Appliance lets the IT administrator install, host and manage all the required IT security solutions as virtual servers (VPS) on one single appliance platform.

scope7-Proxmox-Basic+
More versions with different configurations are available!

**Example configuration
scope7-Proxmox-Basic+**
- ✔ Intel® Xeon® E3v6
- ✔ 32 GB DDR4
- ✔ 2 x 480 GB Intel® SSD
- ✔ 2 x USB 3.0
- ✔ 6 x GbE RJ45 ports
- ✔ 2 x SFP Ports

To take away the complexity of installing a software into the Proxmox appliance, SECUDOS collaborates with software partners to make available their solutions in the SECUDOS Installer Gallery. The gallery offers a wide range of predefined software solutions that can be installed with just a few clicks. There are a variety of solutions available, such as operating systems, mail servers, firewalls, file transfer systems and many more. In addition, you can install OVA machines on the SECUDOS Proxmox appliances via the Installer Gallery. Simple and easy! No need to worry about complex installation steps!

In just one SECUDOS Proxmox Appliance platform, a company can install and host all its applications with SECUDOS as its long term support partner.
